About Me

I am Golam Morshed, I am a AI Software Engineer, Software Technical Support Specialist and Digital Product Trainer with a proven track record in team management as well as digital product development and deployment. With extensive experience in successfully managing and delivering hybrid product in timeframe. As a performance-driven Software Engineer, I specialize in managing large team, developing, and deploying robust and stable digital product. Over the course of 5+ years, I have excelled in managing development team with a strong focus on quality and efficiency. Beyond my technical capabilities, I am recognized as an effective coach and mentor, guiding exceptionally talented teams to achieve their full potential. My passion for innovation drives me to enhance user experiences and streamline processes for optimal results.

Employment History

IT Programming Tutor at Impact A&C Program-Hastings (Part Time), United Kingdom

May 2025 — September 2025

- Tutored students in programming languages such as Python and JavaScript, adapting teaching methods to suit individual learning styles.
- Assisted learners with debugging, code optimization, and understanding core concepts such as data structures, algorithms, and object-oriented programming.
- Developed custom lesson plans, coding exercises, and mini projects to reinforce understanding and practical application.
- Supported students in preparing for coding assessments.
- Provided feedback on assignments and projects to help improve code quality and problem-solving skills.
- Contributed to online learning platforms or forums, helping a wider audience with programming challenges and questions.

IT Project Manager & Technical Lead at Global Shopping Mall Sdn Bhd, Kuala Lumpur, Malaysia

February 2021 — June 2024

- Led a cross-functional team of engineers and product managers to successfully complete a major software project on time and within budget.
- Embedded test-driven development practices into existing processes to elevate the quality of code.
- Rigorously quality-checked code to enhance performance standards, following Agile methodologies.
- Successfully designed, tested, and implemented new and updated in house software application using Laravel and Vue.js Framework.
- Prepare and conduct UAT testing script for in-house software.

- Implemented proactive risk management strategies, identifying potential bottlenecks and challenges early in the project lifecycle to mitigate any adverse impacts on timelines and budgets.
- Collaborated closely with stakeholders to gather requirements, prioritize features, and align project objectives with organizational goals, fostering transparent communication and alignment across teams.

Software Engineer at Yummi Hero Sdn Bhd, Kuching, Malaysia

February 2020 — January 2021

- Developed a custom UI library that increased developer productivity and code reuse.
- Improved JavaScript and CSS quality by conducting code analysis and recommending changes in policies and procedures.
- Optimised web pages for maximum speed and scalability, increasing page views by 100%.
- Created custom design by harnessing HTML, CSS, JavaScript skills.
- Improved website navigation with clear and intuitive UX mapping.

Full Stack Software Developer (Project Lead) at University Malaysia Sarawak (Fixed Term), Kuching, Malaysia.

September 2019 — February 2020

- Design and develop user-friendly staff management and survey system for Malaysian government projects.
- Collaborated with multidisciplinary teams to complete projects on time and within budget.
- Designed and developed scalable APIs to increase the development process.
- Carefully documented technical workflows, using records for training new staff. Ensured bug reports were remedied, handling all associated issues promptly and effectively.
- Deployed new front-end features, capturing higher performance metrics than previous averages.
- Analysed system and software requirements to meet operational needs.
